Kitchen Grips[®] have created a safer oven mitt with increased insulation and grip. Comfortable on the hands, offering a cook more control, a non-slip grip and greater flexibility.

The mitts feature a uniquely designed, raised nub pattern that adds insulation, protecting the hands from hot & cold temperatures (500°F/260°C to -134°F/-92°C.) Made from a unique FLXaPrene[®] material that makes the mitt both water repellent and stain resistant, they will stay looking good and performing well for many years.

The oven mitts are machine washable, can be hand washed with hot water and mild detergent and air-dried or even washed on the top shelf of the dishwasher.
